

SAFETY AND HEALTH POLICY AT WORK according to ČSN OHSAS 18001

The management of MROZEK a.s. undertakes, within the principles of health and safety policy:

- comply with the requirements of all applicable laws, regulations, ordinances and other requirements to ensure conditions for safe and healthy work,
- to create conditions for the continuous improvement of working conditions and the working environment for all workers,
- regularly check and evaluate the state of health and safety in the company and for this purpose set goals and target values in this area,
- emphasize the prevention of potential threats to the health or life of workers and minimize the impact of all their activities on their health,
- require its partners, suppliers to comply with all rules of safe work and an active approach to health and safety issues,
- communicate openly and cooperate with its employees, state administration, customers and the general public about the state of compliance with the principles of occupational health and safety in all activities of the company.

The company's management requires from its employees:

- Company executives are aware that the organization can meet these commitments and achieve its goals only if they set an example by their own behavior and actions.
- Work activities must not be performed at the expense of health and hazardous work procedures must be avoided.
- Each employee accepts his share of responsibility for the safety of himself and his co-workers.
- Cooperation in the implementation of health and safety policy in all its manifestations, a high interest in increasing knowledge of safety and health issues and a clearly positive attitude to the principles of safe behavior.
- Every worker must be an active element in the process of continuously improving working conditions and reducing the risk of damage to health.

In order to fulfill the health and safety quality policy, set goals and programs, the company's management undertakes to:

provide financial and material resources for the efficient and effective functioning of the health and safety management system.
